DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 8, 9 and 20, drawn to a method of treating a viral disease by administering interferon-tau, classified in class 424, subclass 278.1.
- II. Claims 21-28, drawn to a method of treating a condition associated with cellular proliferation by administering interferon-tau, classified in class 424, subclass 278.1.
- III. Claims 29-36, drawn to a method of treating an inflammatory disease by administering interferon-tau, classified in class 424, subclass 278.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to treating different subject populations with unrelated illnesses. The subjects of group I are infected with a viral pathogen, while the subjects of group II have cellular malignancies and the subjects of group III are demonstrating symptoms of inflammation. Each of the subject populations in groups I-III have different responses to the administration of interferon-tau and the treatment regimens for each group would vary upon the symptomatology being treated. The administration of interferon-tau would have different effects upon the different subject populations, depending upon the condition to be treated. Therefore, each of the methods are patentably distinct.

Art Unit: 1648

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III and the search required for group II is not required for Group I or III and the search required for group III is not required for Group I or II because of the diverse subject populations and illnesses being treated, restriction for examination purposes as indicated is proper. In addition, issues that may arise in examination of one group may differ.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
